

## Assignment -1

### Python Programming

Assignment Date	19 September 2022
Student Name	Nithilasri T
Student Roll Number	412419205062
Maximum Marks	2 Marks

#### Question-1:

Write a program which will find all such numbers which are divisible by 7 but are not a multiple of 5, between 2000 and 3200 (both included). The numbers obtained should be printed in a comma-separated sequence on a single line.

#### Solution:

```
l=[]
for i in range(2000, 3201):
    if (i%7==0) and (i%5!=0):
        l.append(str(i))

print(','.join(l))

#-----#
#-----#
```

The screenshot shows the Spyder Python IDE interface. The main editor window displays the following Python code:

```
1 l=[]
2 for i in range(2000, 3201):
3     if (i%7==0) and (i%5!=0):
4         l.append(str(i))
5
6 print(','.join(l))
7
8
```

The IPython console on the right shows the execution of the code, resulting in a long list of numbers that are divisible by 7 but not by 5, separated by commas:

```
Python 3.9.13 (main, Aug 23 2022, 22:51:50) [AMD64] on win32

In [2]:
```

#### Question-2:

With a given integral number n, write a program to generate a dictionary that contains (i, i\*i) such that is an integral number between 1 and n (both included). and then the program should print the dictionary.

Suppose the following input is supplied to the program:

8

Then, the output should be:

{1: 1, 2: 4, 3: 9, 4: 16, 5: 25, 6: 36, 7: 49, 8: 64}

### Solution:

```
n=int(input())
d=dict()
for i in range(1,n+1):
    d[i]=i*i

print d
#-----#
#-----#
```
